

## External Rated Capacity Indicator For Cranes

### Features

- Provides ground personnel with proportional reference of safe load
- Color coded LED display of relative proportional load:
  - Green: 0 to 89%
  - Yellow: 90 to 99%
  - Red (Flashing): 100% +
- Display readable at 250 feet
- Set-up through the LMI (Load Moment Indicator) operator's console
- Compatible with most PAT/Hirschmann LMI's and Internal Rated Capacity Indicators
- Installs quickly and easily in the field. **No calibration required!**
- Matches LMI operating console indicator
- Adaptable for optional external alarm / horn
- Ultra Bright LED's for long life and reliable operation

### Technical Data

- Wide power supply range 9 – 36 VDC
- Operating temperature -25°C to +70°C
- Protection IP 65 / NEMA4X
- Maximum consumption 1.5A w/self-resetting fuse
- Adjustable mounting bracket
- Calibrated to match LMI system
- 132 Ultra-bright LED configuration for long life:
  - Each increment consists of two columns with six LEDs in each:
    - 5 Green increments: 0 – 89%
    - 3 Yellow increments: 90 – 99%
    - 3 Red increments flashing: Overload
- Size: 15 ¼" L x 4 ½"H x 4" D
