

Internal Rated Capacity Indicator For Cranes

Features

- Provides Operator with line-of-sight indication of safe load
- Color coded display of relative proportional load:
 - Green: 0 to 89%
 - Yellow: 90 to 99%
 - Red (Flashing): 100% +
- Display auto adjusts brightness to match ambient brightness
- Set-up through the operator's console
- Compatible with PAT/Hirschmann LMI's and External Rated Capacity Indicator
- Installs quickly and easily in the field. **No calibration required!**
- Matches LMI operating console indicator

Technical Data

- Wide power supply range 9 – 36 VDC
- Operating temperature -25°C to +70°C
- Maximum consumption 0.7A w/self-resetting fuse
- Integral mounting bracket requires two screws
- Mounts to front top roof bar of cab for maximum visibility during pick
- Included cable plugs directly to a port on the LMI
- Adapter available to connect both External and Internal Lightbars
- Factory calibrated to match LMI system
- Ultra-bright LED configuration for long life:
 - 5 Green increments: 0 – 89% of safe load
 - 2 Yellow increments: 90 – 99% of safe load
 - 1 Red increment flashing: safe load exceeded, extreme danger
- Size: 15 ¼" L x 4 ½"H x 4" D
